

Doing Business with the Defense Intelligence Agency

Who We are and What We Do...

The Defense Intelligence Agency's (DIA) Requirements and Research group (R²) leads research and evaluation of next-generation technical solutions for the Department of Defense Intelligence Information System (DoDIIS) Community. R²'s intelligence officers work closely with the intelligence collectors and analysts from DIA, Service Intelligence Centers, Combatant Command Joint Intelligence Centers worldwide, to identify and satisfy requirements for new technologies and information management methodologies. Technical solutions identified by DIA must fit within these Innovation Portfolio Areas:

TECHNICAL GUIDING PRINCIPLES

Customer

- Customer Initiated Assistance
- Customer Preferences
- Customer Relationship Management

Digital Asset

- Content Management
- Document Management
- Knowledge Management
- Records Management

Support

- Administrative Management
- Collaboration
- Communication
- Forms Management
- Search

- Security Management
- Service Oriented Architecture (XML, HTTP/S, SOAP, WSDL, UDDI, Corba, Jini, REST, etc)
- Standards Based (Oasis, J2EE, W3C)
- Data Interoperability and Agility (DIIG)
- Composite Applications (Web 2.0, Mashups, AJAX, etc.)

Process Automation

- Routing and Scheduling
- Tracking and Workflow

Business Analytical

- Analysis and Statistics
- Business Intelligence
- Knowledge Discovery
- Reporting
- Visualization

Hardware Infrastructure

Information Technology

- Information and Technology
- Web Management

Business Management

- Investment
- Management
- Management of Process
- Organizational Management
- Supply Chain Management

Back Office

- Asset Materials Management
- Data Management
- Development and Integration
- Financial Management
- Human Capital Workforce Management
- Human Resources

Steps for presenting/demonstrating technology to DIA:

Step 1: Visit our website and register. Your information is reviewed and compared to Intelligence Community customer requirements.

Step 2: Presentation/Demo. When products or technologies match requirements, vendors are invited to present their technology to DIA.

- Presentations/demos are generally conducted at our New Carrollton, MD facility on Tuesday mornings from 10 a.m. to 12 p.m.
- Presenters are given one hour to present/demo their technologies.

Step 3: Post-Presentation. Based on end-user and technical evaluations you may be invited back for more in-depth discussion about your product/technology. Your information is kept on file as a future solution provider for new requirements.
